PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Science undergraduate with strong analytical and problem-solving skills. Proficient in Python and Java with hands-on experience building full-stack applications. Eager to contribute to software development and data-driven projects in dynamic environments.

EDUCATION

Bachelor of Engineering in Data Science

[Mumbai University, 2022 – 2026 (Pursuing)]

-Higher Secondary Education – Science [Phatak College, 2020 – 2022 (Completed)]

TECHNICAL SKILLS

- Languages: Python, Java, HTML, CSS, JavaScript

- Frameworks & Tools: Flask, Firebase, Git, MySQL

- Soft Skills: Problem-solving, Communication, Multitasking, Fast learner

PROJECTS

- AQI Tracker (Python, Flask, OpenWeather API)

- Developed a web app to monitor, predict, and visualize air quality data by city

- Implemented live AQI fetching, pollutant-specific graphs, forecasting, and comparisons

- Clinic Management System (Python)

- Built a system to streamline clinic operations like appointment scheduling, patient record handling, and billing

- Canteen Management System (Java)

- Developed an application to manage canteen orders, inventory, and daily reports

- Travel Planning System (Python)

- Created a platform for users to explore, manage, and book travel destinations with a smooth user interface

INTERNSHIPS

- Google Cloud Generative-AI Virtual Internship- Web Full Stack Developer Virtual Internship- Python Full Stack Developer Virtual Internship- Google Android Developer Virtual Internship

LANGUAGES

- English: Proficient

- Hindi: Proficient

- Marathi: Native

ADDITIONAL INFORMATION

- Open to internship opportunities in software development, data science, and full-stack roles.

- Willing to relocate and learn new technologies as required.
